

CHAPTER-XIV

FOREST RESEARCH CENTRE HYDERABAD

The Forest Research Centre started functioning in June, 1997 under the administrative control of the Institute of Wood Science & Technology, Bangalore. Building for the Research Centre and staff quarters are coming up on a 40 ha plot provided by the State Forest Department.

The centre has the following objectives.

- To carryout tree improvement studies on socially relevant multipurpose forestry species. Identification of seed production areas, establishment of seed orchards.
- To establish technologically upgraded facilities for the above including tissue culture and mass propagation of propagules. Bio-technology, Tissue culture Laboratory and mass propagation of propagules.
- To establish model nursery, clonal and seedling seed orchards, germplasm bank, provenance trials of selected MPT species for improving the forest productivity.
- Research and demonstration in agro-forestry models.
- To study the bio-diversity of Eastern ghats. Impact assessment of eco-disturbance and rehabilitation.
- To study Non-wood forest products, rare, endangered and threatened medicinal plants and chemistry of Forest Products.
